Swine Vaccines

Circo Guard-V

Prevention and reduction of respiratory disease caused by PCV2 virus

inactivated

VLP technology

Safer vaccine without genetic material

One-shot vaccine

Improved convenience in farm

High purity

Minimized inoculation reaction such as fever and pain

Tricom PLUS

Prevention and control of bacterial respiratory disease caused by Bb, Pm and App

Broad-spectrum

Prevention of multiple bacterial infections(Bb, Pm, App)

High immunogenicity

· Purified toxin based vaccine

Parvo Gene

caused by porcine parvo virus

Prevention of abortion and stillbirth

inactivated

Recombinant protein vaccine

· Safer vaccine without genetic material

Economic Feasibility

· Low injection volume per dose(1mL/dose)

PED Guard

Reduction of porcine epidemic diarrhea

High prevalence genotype vaccine

· Effective protection against G2b subgroup

Productivity increasement

· Increased growth rate by preventing PED virus in farm

Swine Vaccines

Circo Guard V inj.

Prevention of respiratory disease caused by PCV2 virus

Circo-M vac

- Prevention and reduction of respiratory infections caused by PCV2 and mycoplasma infection
- · Reduction of PCV2 virus

Mycoflu

• Prevention and reduction of respiratory infections caused by swine influenza H1N1, H1N2, H3N2 and mycoplasma

MH guard inj.

· Reduciton of swine epidemic pneumonia symptoms caused by mycoplasma infection

PIGTect SEFever Marker inj.

- · Prevention of Classical Swine Fever and Erysipelas
- · Distinguishable from wildtype in CSF

Classical Swine Fever Live Vaccine

· Prevention of Hog Cholera virus infection

New pigRES

• Prevention and control of bacterial respiratory disease caused by *B.bronchiseptica, P. multocida, A. pleuropneumoniae, H. parasuis, S. suis,* and *M. hyopneumoniae*

ColiCI

• Reduction of E. coli and Clostridium spp. on piglets

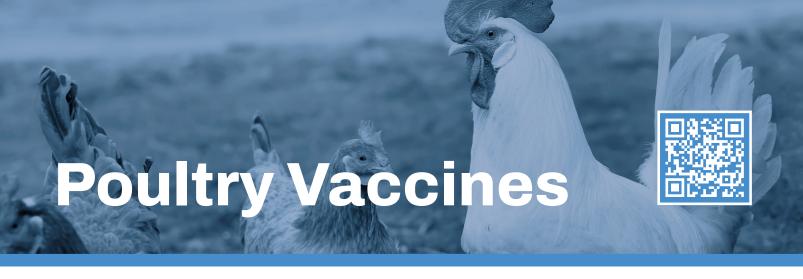

Porcine Parvo Gene Vaccine

Prevention of abortion and stillbirth caused by porcine parvo virus

PED Guard

· Reduction of porcine epidemic diarrhea

ABEN QX

Prevention

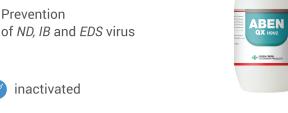

High prevalence genotype vaccine

· GI19 strain used

Cross protection

· For respiratory & kidney

ABBNE Plus(H9N2)

Prevention of ND, IB, EDS and low pathogenic AI(H9N2 type)

💉 inactivated

Convenient and economic

· Total care for the farm

Extensive usability

• Protection of ND, IB, EDS and low pathogenic AI at once

G Vax QXND

Prevention and reduction of ND, IB

live

Customized vaccine

• High prevalence genotype vaccine with newest strain

Convenience in usability

· Aerosol vaccine used in 1-day-old chick hatchery

ND LaSOTA

Prevention of ND

High immunogenicity

• Stronger protection against ND with LaSota strain

BEF

Prevention of Bovine **Ephemeral Fever**

IMMUNGUARD

Improvement of non-specific immunity

live

Extensive usability

· Applicable regardless of breed & body weight

Prevention of vector-borne disease

· Prevention of epidemic mosquito-borne disease

Broad immunity enhancer

🏈 live

· Non-specific immunity enhancement

Productivity increasement

· Effective for reducing somatic cell count in milk

Boviroco

Prevention of viral gastrointestinal diseases caused by bovine coronavirus and rotavirus

Gut Health improvement

· Diarrhea and digestive diseases protection with less intestinal cell intact

Comprehensive protection

· Prevention of diarrhea in calves against gastrointestinal disease

Tulazen inj.

(tulathromycin)

Treatment of respiratory diseases caused by the following bacteria susceptible to tulathromycin

2 weeks long-acting broad-spectrum antibiotics

Skincare

(lincomycin hydrochloride. florfenicol)

Treatment and prevention for topical infections Prevention of infection after various surgeries

Powerful wound healing spray with antimicrobial effect

Cefron Seven

(ceftiofur crystallin free acid)

Treatment and prevention of swine respiratory disease

Cefron inj.

(ceftiofur sodium)

Treatment of respiratory diseases in bovine and swine Prevention of early mortality, associated with E.coli organisms in chicks

One-shot antibiotics injection, lasts for 7 days Antimicrobial without withdrawal period

Marbotol inj.

(marbofloxacin & tolfenamic acid)

Treatment of respiratory infections

Treatment of

(tilmicosin phosphate)

bacterial disease which is sensitive to tilmicosin

G.C. Greentil liquid

Antimicrobial agent with combined antipyretic and analgesic substances

Control of chronic respiratory diseases

Disinfectant & Pain-relief & Nutraceutics

Hi-cop

(triple salt, malic acid, anhydrous citric acid)

Routine disinfection and cleaning of animal shed, instruments, and site.

- Virus: FMD, CSF, ND, AI, ASF and etc.
- Bacteria : Salmonella Typimurium and various bacteria.

Ultimate broad spectrum virucidal disinfectant for ASF, AI, FMD, CSF and ND

Cleanup Plus

(didecyl dimethyl ammonium chloride, citric acid, malic acid)

Disinfection and cleaning of animal shed, instruments, and site.

- virus: AI, FMD, PED and ASF
- Bacteria : Salmonella Typhimurium, Brucella ovis

Easy-to use liquid disinfectant for ASF, AIV, FMD and PEDV

Brompower liquid

(bromhexine & phenylbutazone sodium)

Ancillary treatment of inflammatory or infectious disease

High synergy effects of Phenylbutazone and Bromhexine, as a Mucolytic NSAID

Catoforce inj.

(butaphosphan, vitamin B12, taurine, nicotinamide, L-methionine)

Treatment of acute disease and acute metabolic disorder, slight paralysis, anorexia, decrease in lactating, recmore thany of fatigue, infirmity

Stimulation of metabolism, appetite stimulation and antioxidation for better feed efficiency, weight gainment and vitality

Betaimmune

(betaine hydrochloride, taurine, ascorbic acid)

Prevention of various stress and dehydration. (e.g. caused by high temperature or disease)

Increasement of immunity, management solution for hot-tempured environment by and vitamin, mineral suppliment and lowering electrolyte dificiency

Indogenabil inj.

(menbutone)

Relaxant action of fever, ketosis, weakness, decreased milk production by appetite-enhancing after illness or post-surgery recovery

Parasiticides

DHPPL

Prevention of distemper, hepatitis (Canine Adenovirus Type 2), parvovirus, parainfluenza-2 virus, and leptospirosis

Rabies

Prevention of rabies in dogs, cats, ferrets, raccoons, cattle, horses and sheep

In-activated

Core vaccine

· World wide steady seller

Well-known 5-in-1 vaccine

· Protect dogs against five highly contagious viral diseases

High safety

· Genetically modified rabies vaccine

GFP-tagged vaccine

• Easy differential diagnosis between vaccine and street virus

New-Parcoro

Prevention of digestive diseases caused by parvovirus, coronavirus and rotavirus

In-activated

G Vax-KC

Prevention of canine respiratory disease caused by B. bronchiseptica

G Vax-Caniflu

Prevention and reduction of respiratory infections caused by canine influenza virus (H3N1)

In-activated

Total care for Gastrointential disease

 Protection against 3 gastrointestinal viruses

Patented vaccine strain by GCVP

· High efficacy and safety

Whole Cell + cDNT

In-activated

 High immunogenicity against B. bronchiceptica

High purified toxin

· Low LPS content with purification process

Cross-protection against H3N2

· Broad immunity against epidemic genotype and variants

Prevention of non-seasonal influenza virus

· Vaccination is essential based on lifestyle and risk

Pain relief & Antibiotics

Trevicox

(firocoxib)

Treatment of inflammation and pain relief associated with osteoarthritis

Duravet

(tulathromycin)

COX-2 selective inhibition allows for long-term administration with low side effects in the digestive system

Immediate effect - sustained effect that appears in 30 minutes and lasts for 24 hours

Effective for pain caused by tumors and chronic diseases of senior animals

2 weeks long-acting broad-spectrum antibiotics (gram negative, gram positive)

Antibiotics without discoloration that can be stored at room temperature

Easy to use without dilution

Vetrocam inj. & suspension.

(meloxicam)

Pain relief and inflammation caused by acute and chronic musculoskeletal disorders

Non-steroidal anti-inflammatory drug (NSAID), for the treatment of pain in dogs

Manage post-operative pain by applying various pain relief

COX-2 selective inhibition reduce the risk of gastrointestinal ulceration caused by non-selective NSAIDs

Pimomedin

(pimobendan)

Treatment of congestive heart failure due to dilated cardiomyopathy or valve failure (mitral and tricuspid valve regurgitation)

Exect Capsule

(trilostane)

Treatment of pituitary-dependent and adrenal-dependent hyperadrenocorticism (Cushing's disease and its syndromes) in dogs

Easy to feed with a small tablet and being not lumpy

Safe use with therapeutic equivalence

Reduces the production of cortisol by the adrenal glands

Successfully management way of Cushing's syndrome and improve pet's quality of life

Novart inj. & Tablet

(maropitant citrate)

Prevention of nausea due to chemotherapy and prevention of vomiting due to motion sickness in dogs

Effective for all types of vomiting by acting on the vomiting center

Nutraceutics for Exotic & Diagnostic equipment

G-REP: LACTO

Prevention of diarrhea with Saccharomyces boulardii

G-REP: BONE(day) G-REP: BONE(night)

Prevention of MBD with Coral Calcium

Acting in the intestines by using coated lactic acid bacteria

Bromelain, an natural antibacterial extracted from pineapple, help digest and protein and nutrients

Coral calcium and vitamin D boost calcium absorption in body

Milk thistle and various mineral ingredients maximize calcium absorption

Green lipped mussel powder relieve arthritis caused by MBD

Clover A1C

Measurement of glycated hemoglobin in dogs and cats

Measure within 5 min, with minimum blood volume (4µL)

Average blood glucose measurement for 2 ~ 3 months with one HbA1c measurement

Oti-derm

(miconazole nitrate, prednisolone acetate, polymyxin b sulfate)

Treatment of otitis externa and skin diseases in dogs and cats

Ear cleaner for dogs and cats

(salicylic acid, chloroxylenol)

Oti-pure

Optimization of otitis externa treatment with synergy effect by containing antifungal and antibiotic substances

Blocks the cause of otitis externa by coating the wound inside the ear with oil

Tris-EDTA significantly enhances antibiotic efficacy

Minimize skin irritation and protect skin

Dr. Skin

(lincomycin hydrochloride, florfenicol)

Derma cool spray

(hydrocortisone, lidocaine hydrochloride hydrate)

Atoban G&S

Treatment and prevention of external infections caused by bacteria susceptible to lincomycin and florfenicol

Relief of skin itching (pruritus)

Intensive skin trouble care

Combination of bactericidal, exfoliating, skin regenerating, and moisturizing

Easy appling without smeared on the hand

Hydrocortisone, lidocaine spray that relieves dog skin itching

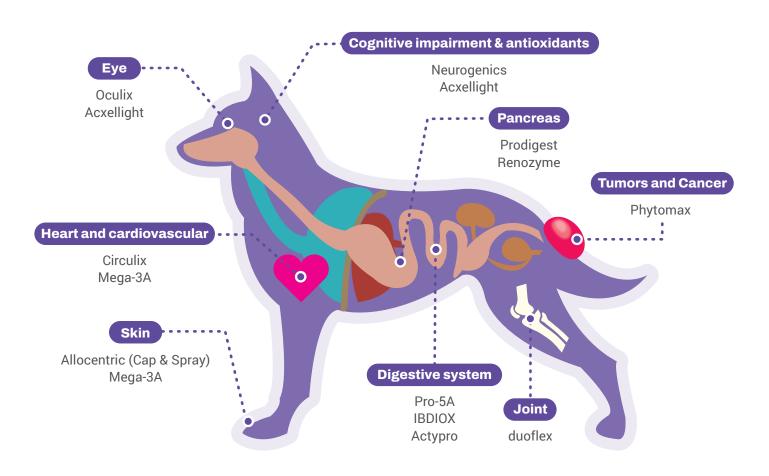

Least side effect by using mildest glucocorticoids class 7

Using immunotherapeutic substance to restore skin barrier, replenish moisture and relieve itching

First option for non-infectious skin diseases, efficacy increased when combined with treatment drugs

Total Comprehensive Nutraceutical Solutions

Pro-5a(Dog&Cat): 15mL

- 1. Liquid form alive probiotics can be stored at room temperature (1~30°C)
- 2. Due to Lag phase sufficiently applicable with a small amount with high stability

Mega-3A:80g

- Refined fish oil boost animal's immune system to helping maintain a helathy heart and good circulation
- Microencapsulation protects Omega-3 fatty acid from rancidity for easy store
- Helpful for brain development and against dementia

DuoFlex: 22g

- 1. Dual effect of joint pain reduction & joint protection
- 2. Convenient feeding with granule type and sweet scent
- Replace withdrawal period of NSAID

Prodigest: 30 capsules

- 1. Excellent effect on chronic vomiting in the upper digestive system with herbal extracts
- 2. Directly acting on the pancreas to protect the pancreas improve symptoms related to pancreatitis
- 3. Convenience of feeding by minimizing the bitter taste by encapsulating the powder

Neuro-Genics: 30 capsules

- Multi-target mechanism: Helps improve various cognitive impairment factors
- Brain-Gut Axis and nerve cell protection help brain health

Axcel-Light: 28 mL

- 1. Liquid form antioxidant without preservative
- 2. Easy and effective application with small amount
- Applicable to senior dogs/cats such as eyes and inflammatory reactions

Renozyme: 60g

- 1. Composed of complex digestive enzymes, it facilitates the decomposition and absorption of nutrients
- Helps improve symptoms such as diarrhea, vomiting, and loss of appetite

Ibdiox: 30 capsules

- 1. Improving the condition of animals with IBD by restoring inflammation and intestinal mucosal defense function
- 2. Non-steroid, possible to feed without steroid side effects

Allocentric cap: 30 capsules

- 1. Applied to skin allergy-related diseases such as allergy, atopic dermatitis, and skin inflammation by suppressing inflammation and controlling immune response
- Long-term feeding without side effects by non-steroids and non-antihistamines

Allocentric Spray: 100mL

- 1. Helps control skin diseases by improving damaged skin barriers such as replenishing moisture
- Safe to use without preservatives, steroids and alcohol

Bunelow: 3.5g x 60 (210g)

- 1. Supplement for improving kidney value
- 2. BUN, Creatinine, SMDA level improvement effect
- 3. Easy to feed with high palatability in the form of puree

Actypro: 10 capsules

- 1. Granule type active yeast probiotics
- 2. Treatable with antibiotics, and preventing and managing antibiotic-associated diarrhea(AAD)

Phytomax: Cx(60 capsules) & Lx(80mL)

- 1. Synergistic effect in tumor patient support and treatment by activating immune cells & NK cells
- 2. Inhibiting tumor metastasis, promoting immune-related cells, and activating NK cells

Circulix

Cardiovascular supplements

Oculix

Eye supplements

Canimax

Comprehensive nutritional supplement for dogs

Felimax

Comprehensive nutritional supplement for cats
